IT Programs: Diploma Program: Artificial Intelligence:

52-Week Online or On-Campus Artificial Intelligence Diploma Program Artificial Intelligence (AI) is transforming the personal and professional lives of people all over the world. AI refers to the development of computer systems that can perform tasks usually requiring human intelligence, such as visual perception, speech recognition, and even decision making.

You have the choice to complete the Artificial Intelligence Diploma on-campus or online through distance education. If you live near the Greater Toronto Area, our campuses are open for students looking for hands-on, practical application. Alternatively, distance education is available to students looking to pursue an education and get the flexibility and support needed to succeed.

Become a Qualified Artificial Intelligence Professional

During this program, you will learn topics surrounding AI's current capabilities and its future potential, machine learning techniques, applied data methods, and much more.

Whether you are just starting out, building on existing IT skills, or are wanting to sharpen your AI knowledge, this program can help you expand your knowledge on the subject and enhance your skills to start a new, rewarding career.

You will also complete a 350-hour practicum so that you'll feel fully prepared to enter the Artificial Intelligence industry. CCBST is 100% responsible for finding a placement for you at an appropriate organization.
